A few words on packing light:

We all want to do it, but really don't want to leave behind the essential items. So, the answer is to purchase lighter gear. The main items to pay attention to are the backpack and the sleeping bag. Shoot for 3.5-4.5 lbs. for the pack. Thinner hip pads, thinner fabric and less buckles all shave weight. The bag should be down and weigh about 2.5- 3.5lbs. The lightest sleeping pads are the foam models. Thermarest also makes a lightweight line of air inflated pads. The pad can also be 3/4 length to save weight. For this option, use your pack at night to insulate your feet. Best of luck with your packing and give us a call if you have any questions! 1-877-686-2546
